## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-3 and 20, drawn to a shelf stable pasta or rice meal with sauce, classified in class 426, subclass 589.
- II. Claims 4-19, drawn to a two part packaged product and process of making the product, classified in class 426, subclass 120.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially

different process that does not require a separate packaging of the sauce and the pasta or rice, as claimed in Group I.

Inventions I and II are also related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination does not require packaging. The subcombination has separate utility such as fresh, a non-packaged product or as a product packed in a one part package.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1761

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
